

KAVINPRASANTH K M

Full-Stack Developer • AI Engineer • Cyber Security Specialist

Coimbatore, India | kavinprasanth2306@gmail.com | +91-XXXXXXXXXX
kavinprasanth.in | github.com/kavinprasanth2306-a11y | linkedin.com/in/Kavinprasanthkm

SUMMARY

Computer Science undergraduate and hands-on developer who ships production-grade products across web, mobile, and AI domains. Experience spans full-stack development (React, TypeScript, Flutter), deep learning (PyTorch, GANs), and offensive security (JWPT-certified penetration tester). Google Cloud Digital Leader certified. Passionate about building fast, secure, and user-centric software.

EDUCATION

B.Tech, Computer Science & Engineering

2025 – 2029

Karunya Institute of Technology and Sciences, Coimbatore

Specializing in AI/Deep Learning, Full-Stack Development, and Cyber Security.

EXPERIENCE

Penetration Tester — Intern

Jun 2026 – Jul 2026

HackersDaddy Cyber Security Solutions · London, UK (Remote)

- Performed OWASP Top 10 vulnerability assessments and full VAPT audits on real-world web application lab environments.
- Used Burp Suite, Nmap, and OWASP ZAP for reconnaissance, scanning, and manual exploitation of security flaws.
- Conducted API security testing and documented findings with severity ratings and remediation reports.
- Cleared the Junior WebApp Penetration Tester (JWPT) certification exam; selected via the competitive 'Hashes Over Roses 3.0' event.

PROJECTS

Wazabi — Full-Stack E-Commerce Platform

React, TypeScript, Express, SQLite, Razorpay

Built a production e-commerce site (live at wazabi.in) with JWT auth, Razorpay payments, cart & checkout flow, wishlist, product search, and a custom admin dashboard with analytics.

AI Image Generator

Python, PyTorch, Flask, GANs

Trained custom GAN and Autoencoder models from scratch on CUDA to generate class-based images; served the models through a real-time Flask REST API with a web interface.

CTF Toolkit — Automated Pentest Suite

Python, Nmap, SQLMap

Developed a modular CLI that chains reconnaissance, web exploitation (SQLi, XSS, LFI), crypto solving, and hash cracking into a single automated pipeline with report generation.

MemSee — CPU Addressing Mode Visualizer

React, TypeScript, Google Gemini AI, Vite

Interactive learning tool that simulates CPU data flow (IR, ALU, MAR, Memory) in real time across 6 addressing modes, with AI-powered contextual explanations via Google Gemini.

Scarlet Manga — Cross-Platform Reader App

Flutter, Dart, Firebase

Manga/manhwa reader with an offline download manager (5 concurrent downloads), biometric vault for private content, and integrated video playback.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Dart, C/C++
Frontend & Mobile	React, Vite, Tailwind CSS, Flutter, HTML/CSS, Framer Motion
Backend & Databases	Node.js, Express, Flask, SQLite, Firebase
AI & Security	PyTorch, GANs, Kali Linux, Penetration Testing (Burp Suite, Nmap, SQLMap)
Cloud & Tools	Google Cloud, Git, GitHub

CERTIFICATIONS

- **Google Cloud Digital Leader** — Google Cloud (2026)
- **Junior WebApp Penetration Tester (JWPT)** — HackersDaddy (2026)
- **Python Programming Track** (6 courses) — DataCamp
- **Git & GitHub Track** (7 courses) — DataCamp
- **MATLAB Onramp** — MathWorks
