SUMMARY

Computer Science undergraduate and hands-on developer who ships production-grade products across web, mobile, and AI domains. Skilled in full-stack development (React, TypeScript, Flutter), deep learning (PyTorch, GANs), and offensive security. JWPT-certified penetration tester and Google Cloud Digital Leader.

EDUCATION

B.Tech, Computer Science & Engineering

2025 – 2029

Karunya Institute of Technology and Sciences, Coimbatore — Specializing in AI/DL, Full-Stack & Cyber Security

EXPERIENCE

Penetration Tester — Intern

Jun – Jul 2026

HackersDaddy Cyber Security Solutions · London, UK (Remote)

- Performed OWASP Top 10 vulnerability assessments and VAPT audits on real-world web application labs.
- Used Burp Suite, Nmap, and OWASP ZAP for reconnaissance, scanning, and manual exploitation; conducted API security testing with documented remediation reports.
- Cleared the Junior WebApp Penetration Tester (JWPT) exam; selected via the competitive 'Hashes Over Roses 3.0' event.

PROJECTS

Wazabi — Full-Stack E-Commerce Platform

React, TypeScript, Express, SQLite, Razorpay

Production e-commerce site (live at wazabi.in) with JWT auth, Razorpay payments, cart/checkout, wishlist, product search, and an admin dashboard with analytics.

AI Image Generator

Python, PyTorch, Flask, GANs

Trained custom GAN and Autoencoder models from scratch on CUDA to generate class-based images; served via a real-time Flask REST API with a web UI.

AYLA — AI Fashion Styling Assistant

Flutter, AI/ML, 3D Models, PDF

AI-powered Indian fashion styling & tailoring app with 3D garment visualization, image-based measurements, and exportable tailor-ready PDF pattern sheets.

CTF Toolkit — Automated Pentest Suite

Python, Nmap, SQLMap

Modular CLI chaining reconnaissance, web exploitation (SQLi, XSS, LFI), crypto solving, and hash cracking into one automated pipeline with report generation.

MemSee — CPU Addressing Mode Visualizer

React, TypeScript, Google Gemini AI

Interactive tool simulating CPU data flow (IR, ALU, MAR, Memory) across 6 addressing modes, with AI-powered explanations via Google Gemini.

Jarvis — Desktop Voice Assistant

Flutter, TTS, Speech Recognition

Cross-platform desktop AI assistant with system-tray integration, voice commands, text-to-speech, and audio recording backed by a Python service.

Portfolio Website

React, Vite, Tailwind, Framer Motion

Interactive personal portfolio (kavinprasanth.in) with glassmorphism UI, Cmd+K command palette, terminal mode, light/dark themes, and 100% SEO score.

Desktop Billing App

Flutter, SQLite, PDF

Offline desktop billing system with SQLite storage, PDF invoice generation, sales charts, and inventory management for small businesses.

AURA Azure — Hotel & Dining Website

JavaScript, Vite, CSS

Responsive hotel & restaurant site with menu browsing, dining-venue selection, table reservations, and a dynamic cart-based ordering flow.

TECHNICAL SKILLS

Languages

Python, TypeScript, JavaScript, Dart, C/C++

Frontend & Mobile

React, Vite, Tailwind CSS, Flutter, HTML/CSS, Framer Motion

Backend & Databases

Node.js, Express, Flask, SQLite, Firebase

AI & Security

PyTorch, GANs, Kali Linux, Pen-Testing (Burp Suite, Nmap, SQLMap)

Cloud & Tools

Google Cloud, Git, GitHub

CERTIFICATIONS

Google Cloud Digital Leader (2026) • JWPT — Penetration Tester (2026)
